VAX VICON ACCESS CONTROL

Combining advanced security technology with simplified access control for seamless integration.

VAX Access Control components provide a flexible system offering scalability of the hardware components – the system grows according to your security needs.

Order VAX software pre-installed on a Vicon certified server or install it on a standalone PC.

Choose from a variety of controller options for doors, I/Os and elevators, including the NEW Master Multi-Door Controller for up to 8 doors.

VAX supports leading card/reader systems, including mobile credentials technology and high-security smartcard readers.

User-friendly navigation allows you to manage and effectively report and act on critical security events.

User-friendly, browser-based interface with responsive web design.

Monitoring Menu Notification Layout Option
Horizontal and vertical tile views provide a clear representation of 12-18 reader events at once in multiple view layouts.

Improved Table Update Speed
The speed and reliability of table updates for the VAX over-the-door, elevator, Master multi-door and I/O controllers have shown improved performance in excess of 400% in some circumstances.

Support for Fixed Site Codes
Using a fixed site code for installations where the site codes are not available or consistent is supported.

V!X's Powerful Action Control Engine

ADD/REMOVE USER FROM ACCESS GROUP
Dedicated action to make configuration easier and improve performance.

SET CUSTOM FIELD
The value of a user's custom field is set directly from an action.

NOTIFY ADMINISTRATOR
Allows the display of a popup to one or more administrators, which can include custom text, images or even display a camera.
